ALTER

The MySQL ALTER TABLE statement is used to add, modify, or drop/delete columns in a table. The MySQL ALTER TABLE statement is also used to rename a table.

ALTER – ADD COLUMN

The syntax to add a column in a table in MySQL (using the ALTER TABLE statement) is:

ALTER TABLE table_name

ADD new_column_name column_definition

[FIRST | AFTER column_name];

- column_definition - The datatype and definition of the column (NULL or NOT NULL, etc).
- FIRST | AFTER column_name - Optional. It tells MySQL where in the table to create the column. If this parameter is not specified, the new column will be added to the end of the table.

ALTER – ADD COLUMN

Example:

```
CREATE TABLE `test`.`filmy`  
(`ID` INT NOT NULL,  
`ROK` YEAR NOT NULL ) ENGINE = InnoDB;
```

ID	ROK
----	-----

```
ALTER TABLE filmy  
ADD COLUMN NAZOV char(50)  
AFTER ID
```

ID	NAZOV	ROK
----	-------	-----

ALTER – ADD COLUMN

ID	NAZOV	ROK
----	-------	-----

Example:

```
ALTER TABLE `filmy`  
ADD ZANER char(20),  
ADD IMDB DECIMAL(2,1) NOT NULL,  
ADD VYMAZAT char(20) AFTER ROK;
```

ID	NAZOV	ROK	VYMAZAT	ZANER	IMDB
----	-------	-----	---------	-------	------

ALTER – ADD

```
CREATE TABLE `filmy`  
(  
  `ID` int(11) NOT NULL,  
  `NAZOV` char(50)  
);
```

Example:

```
ALTER TABLE `filmy`  
ADD PRIMARY KEY (`ID`),  
ADD UNIQUE KEY `ID` (`ID`);
```

ALTER – MODIFY COLUMN

The syntax to modify a column in a table in MySQL (using the ALTER TABLE statement) is::

```
ALTER TABLE table_name  
    MODIFY new_column_name column_definition  
    [ FIRST | AFTER column_name ];
```

ALTER – MODIFY COLUMN

ID	NAZOV	ROK	VYMAZAT	ZANER	IMDB
----	-------	-----	---------	-------	------

VYMAZAT char(20)

Example:

```
ALTER TABLE filmy
```

```
MODIFY COLUMN VYMAZAT char(30) NULL;
```

ALTER – DROP COLUMN

The syntax to drop a column in a table in MySQL (using the ALTER TABLE statement) is:

```
ALTER TABLE table_name  
DROP COLUMN column_name;
```

Example:

ID	NAZOV	ROK	VYMAZAT	ZANER	IMDB
----	-------	-----	---------	-------	------

```
ALTER TABLE filmy  
DROP COLUMN VYMAZAT
```

ID	NAZOV	ROK	ZANER	IMDB
----	-------	-----	-------	------

ALTER – RENAME COLUMN

The syntax to rename a column in a table in MySQL (using the ALTER TABLE statement) is:

```
ALTER TABLE table_name
```

```
  CHANGE COLUMN old_name new_name
```

```
    column_definition
```

```
    [ FIRST | AFTER column_name ]
```

ALTER – RENAME COLUMN

ID	NAZOV	ROK	ZANER	IMDB
----	-------	-----	-------	------

ROK YEAR(4) NOT NULL

Example:

ALTER TABLE `filmy`

CHANGE `ROK` `ROK\_VYDANIA` YEAR(4) NOT

ID	NAZOV	ROK_VYDANIA	ZANER	IMDB
----	-------	-------------	-------	------

ALTER – RENAME TABLE

The syntax to rename a table in MySQL is:

```
ALTER TABLE table_name  
    RENAME TO new_table_name;
```

Example:

```
ALTER TABLE FILMY  
    RENAME TO ZOZNAM_FIMOV;
```
