UPDATE

The UPDATE statement is used to update existing records in a table.

Syntax:

```
UPDATE table_name  
SET column1=value1,column2=value2,...  
WHERE some_column=some_value;
```

UPDATE

Example:

```
UPDATE Customers  
SET ContactName='Alfred Schmidt', City='Hamburg'  
WHERE CustomerName='Alfreds Futterkiste';
```

UPDATE

Update Warning!

Be careful when updating records. If we had omitted the WHERE clause, in the example above, like this:

Example:

```
UPDATE Customers
```

```
SET ContactName='Alfred Schmidt', City='Hamburg';
```

```

```
